**File**: Read me

Question: 3 (Assignment 2)

Date: 27 February,2019

Problem Statement: MATLAB function that receives from the user the following inputs:

- o   The user's Gmail email information (email id and password)
- o   A destination email address
- o   The directory and the name of an image file

Flowchart of the Code:

1.Get information of sender id and password

2.Getting information of the receiver id

3.Getting information of subject and message of the mail

4.Getting the attached file from the given folder path

5.Mail Function:

✓   Connecting to SMTP server
✓   Connecting to Gmail server
✓   Sending mail to receiver

6.Received mail

Software: MATLAB R2018b

https://www.mathworks.com/products/matlab.html

Instructions: Open MATLAB application and open Send_Mail.m. Change the sender and receiver id and sender password of the mail and run the code.
